Ethnographic engagements with digital alterity, Panel CFP for the AAA Meeting, Denver, CO, November 18-22, 2015

Organizers: Hannah Knox (UCL) and Antonia Walford
 Discussant: Tom Boellstorff (UC Irvine)

As digital technologies become ever more ubiquitous as artefacts and infrastructures via which human relations are conducted, this panel explores an approach to digital relations that asks not whether the digital is virtual or real, but just what kind of reality the digital is. Rather than taming digital technologies by incorporating them into standard anthropological accounts of either technology design or technology use, we approach the digital real as a specific space of alterity with rich implications for anthropological theory.

From the sensory infrastructures which feed data streams that are analysed by algorithms to the distributed networks of programmers and players that make gaming environments, digital technologies do not simply provide representations of an external world, but participate in the organisation of relations through which new worlds are brought into being. Moving beyond a dialectic of human/technology or virtual/real, this panel aims to both explore the epistemological dynamics by which such separations and boundaries are reproduced, and to push towards an approach to digital technologies that allows for the relational specificity of a variety of digital forms (e.g. computer models, social media platforms, digital devices, and online games) to be interrogated as active and often unfamiliar (/Other) participants in human social worlds. Looking to the disruptive, unsettling, or transformative effects of digital technologies, this panel aims to explore how they raise new questions about the role of difference, identity, simulation, fakery, newness, automation, unpredictability, invisibility, authenticity and agency for anthropological accounts of social relations.

We invite papers from a wide range of ethnographic settings to address such issues as the semiotics of algorithms, the phenomenology of number, the materiality of digital infrastructure, the relational extensions of networks and the ontological cuts that such technologies effect. In drawing attention to ontology, we are interested in the question of how digital technologies not only perform and produce the boundaries of the 'real' as we know it, but are also active in defining new, strange spaces beyond those boundaries; and what implications this might have for reframing what we might call a 'digital' form of anthropology. Please send abstracts (250 words) to [Antonia](#) and [Hannah](#) by Friday April 3, 2015.

Awards & Funding Opportunities

Call for Nominations: Site Preservation & Conservation and Heritage Management Awards

The AIA is seeking nominations for the Best Practices in Site Preservation and Conservation and Heritage Management Awards. Please forward this information to appropriate colleagues.

Best Practices in Site Preservation Award

The Archaeological Institute of America's [Best Practices in Site Preservation Award](#) is presented to a group or project recognized by their peers for doing exemplary work in the field of site preservation and conservation. A \$5,000 grant will be awarded to the winners to further their best practices in site preservation. Award winners will be selected by a committee of professional archaeologists, conservators, and heritage specialists before the AIA's Annual Meeting in January 2016.

Please nominate deserving projects through the nomination form on the AIA's website at <http://www.archaeological.org/sitepreservation/award>. **The deadline for this award is May 1, 2015**; no nominations will be accepted after this date. Early submission is encouraged.

Conservation and Heritage Management Award

The AIA's Conservation and Site Preservation Committee invites nominations for the [Conservation and Heritage Management Award](#). This award is made in recognition of an individual's or institution's exceptional achievement in any of the following areas:

- 1) Archaeological conservation
- 2) Archaeological conservation science
- 3) Archaeological heritage management
- 4) Education/public awareness of archaeological conservation through teaching, lecturing, and exhibition, or a publication.

Please send name(s), a CV, and a substantive statement about the nominee's qualifications for the award to: awards@aia.bu.edu

PhD Studentship in Archaeology (Dental Morphology), University of Southampton

Teeth & their use for estimating age-at-death in British archaeological human remains

Applications are invited for a fully funded AHRC Collaborative Doctoral Award between the Archaeology at University of Southampton and English Heritage. The aims of the PhD are to develop a cost effective mechanism of assessing age-at-death from dental morphology in British archaeological skeletal remains (a dental attrition profile) and to develop methodologies for age estimation that can be broadly and easily applied by other researchers. The PhD will synthesise changes in dental morphology with social changes in dental treatment in historic and prehistoric British contexts in order to develop a nuanced understanding of change in dental morphology in relation to changes in diet and social practice in Britain. Application deadline is May 22, 2015. For info on application, please see:

Che Guevara Volunteer Work Brigade, April 26-May 9, 2015, Cuba

The Canadian Network on Cuba and the Cuban Institute of Friendship with the Peoples invite participation in the 23rd annual Che Guevara Brigade. The annual Ernesto Che Guevara Volunteer Work Brigade was established in 1993 to exchange political and cultural ideas with Cuba in the spirit of solidarity and respect. The Ernesto Che Guevara Volunteer Work Brigades itinerary includes up to 10 days of volunteer work. While this work is physical, the pace is not strenuous and should not deter the not-so-young-and-fit. In the past Brigadistas have ranged in age, from 10-75! The morning is our main work time, where Brigadistas work alongside Cubans sharing, learning and having an important exchange. After lunch time Brigadistas have meetings with various groups and organizations, or visit the beach, or enjoy some free time. Further details at
